The STANFORD FUND  
Stanford, California 94305

Gentlemen:

In recent years I've sought a medium of maximum leverage for the modest estate my wife and I will leave. At present eugenics appears most promising; and I'm corresponding with the American Eugenics Society.

Meanwhile, perhaps you can find someone to summarize what Stanford is doing, or would like to do, about the problems rather hazily outlined in the attached article. How could \$100,000+ be applied within the next 10 to (hopefully) 20 years, as it looks now?

P. S. Barrows
